PROFILE

Results-driven and detail-oriented Front-End Developer with 7 months of experience in designing and implementing responsive web applications. Proficient in HTML5, CSS3, JavaScript, and front-end framework such as React. Skilled in optimizing website performance and user experience through efficient code and intuitive designs. Demonstrated expertise in collaborating with cross-functional teams and delivering high-quality projects within deadlines. Committed to staying updated with emerging web technologies and continuously enhancing skills to deliver cutting-edge solutions. Passionate about creating visually appealing and user-friendly interfaces that drive positive user engagement and business growth.

EMPLOYMENT HISTORY

Oct 2022 — Apr 2023

Front End Developer, SearchBar

Sydney

1. Developed and maintained responsive and dynamic user interfaces using HTML, CSS, and JavaScript.
2. Launched a responsive e-commerce website that increased sales by 20%.
3. Collaborated with a design team to develop a custom WordPress theme that improved website load times by 50%.
4. Integrated third-party APIs and plugins to enhance website functionality and user experience.
5. Optimized website performance using front-end techniques such as lazy loading, image optimization, and code minification to improve user experience.
6. Maintained front-end components and libraries using JavaScript frameworks such as React.
7. Collaborated with UI/UX designers, back-end developers, and stakeholders to implement design specifications and ensure a seamless user experience.

Nov 2017 — Feb 2018

IT Support Intern, Bosch

Sydney

1. Providing technical support to end users, either remotely or in person, and resolving hardware and software issues in a timely and efficient manner.
2. Setting up and configuring computer hardware, software, and peripheral devices for end users, and troubleshooting related issues.
3. Administering and maintaining user accounts and permissions, and ensuring system security by implementing appropriate access controls.
4. Monitoring network and system performance to identify and resolve issues before they affect end users.
5. Creating and maintaining documentation of IT systems and processes, including standard operating procedures, user guides, and training materials.
6. Collaborating with other IT team members to diagnose and resolve more complex technical issues, and escalating issues to appropriate teams when necessary.
7. Performing regular system backups and disaster recovery procedures to minimize data loss and ensure business continuity.
